# Feeling Creative?

*What if there was a Creative Space in Murchison – how would you use it?*

*What is a Creative Space?*

A Creative Space is a community space with a focus on the arts and creativity where everyone is welcome.

You might drop in to the Open Studio – where there may be a range of materials for trying out – or perhaps you might take up an opportunity to participate in workshops or programmes. This might be free or by donation or perhaps there may be a charge for events such as workshops.

Creative Spaces are successful and enjoyable because a broad range of activities are possible – everyone can have a go and it is not too difficult to meet with some success!

The benefits of participating in the arts are many and varied, and all have a positive spin-off for the community.
